

Rapid Deployment

Talk To Us Rapid Deployment technologies are the perfect solution for getting a phone line in for a customer almost instantly. This means for you:

- You can offer them full phone services in the interim before a physical line can be connected
- You can begin charging for services instantly, avoiding lost revenue on lines taking weeks to be installed
- You can set them up with full service for any temporary or new offices

If you install analog or ISDN telephone lines, this is an excellent opportunity to offer your customers something more. Talk to us today about offering this exciting and accessible technology.
